*** SIMULATED TEST DOCUMENT - NOT AN OFFICIAL RECORD - ACADEMIC/NLP BENCHMARK USE ONLY ***

Smart Industrial Solar Microgrid & Automated SCADA Energy Monitoring

Tender Reference: TENDER-2024-SOLAR-003 | **Authority:** Renewable Energy Development Authority

LEGAL NOTICE: *This tender document is a simulated artifact created strictly for testing and validating Natural Language Processing compliance evaluation algorithms. It does not represent an actual public solicitation.*

Category	Clean Energy Engineering
Procurement Method	Open Competitive Bidding (Two-Envelope Electronic System)
Simulation Status	SIMULATED DATASET – FOR DEMO & TESTING PURPOSES ONLY

1.0 Scope of Work

Turnkey supply, installation, testing, and 3-year operation of 50MW distributed rooftop solar PV arrays with smart SCADA telemetry.

2.0 Financial Eligibility

2.1 Turnover: Average audited turnover of at least USD 5.0 Million.

2.2 Solvency: Solvency certificate verifying USD 1.0 Million net worth.

3.0 Technical Specifications & Domestic Content

3.1 Telemetry Uptime: Minimum 99.50% uptime SLA for automated SCADA data feeds.

3.2 Local Value Addition: All primary hardware and inverters must be Tier-1 OEM certified with at least 50% domestic value addition.

3.3 Bandwidth: Data telemetry capacity of at least 500 MB/s.

4.0 Past Performance & Engineering Core

4.1 Engineering Experience: At least 10 years commercial experience in high-voltage solar grid SCADA.

4.2 Reference Scale: At least 5 similar reference contracts valued at USD 1.0 Million or more.

4.3 On-Site Engineers: Minimum 4 dedicated certified engineers on-site during installation.

5.0 Warranty & Statutory Compliance

5.1 Warranty: 24 months warranty from commercial operations date.

5.2 Statutory Compliance: Non-blacklisting declaration and ISO 9001 certification.
